SAFE TENSIONING SYSTEM

INDUSTRIAL PUMPS REPAIR SERVICE

COATING SERVICE

We service, repair and fine-tune your pumps and mechanical seals. From on-site disassembly to restarting your pump, we take care of everything.

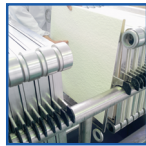

We apply anti-abrasion coating to your metal surfaces and rebuild them. We treat and renovate your concrete surfaces with acid-resistant composites and injections of impermeable resins.

Filter your food, pharmaceutical or chemical media with our filters

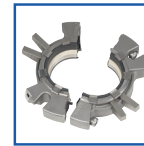

Tighten your large nuts and bolts simply and easily with **Superbolt®** tensioners

Seal your threaded connections with **Chesterton® GoldEnd® Tape**

Protect your pump bearings with **Chesterton® 30K** seals

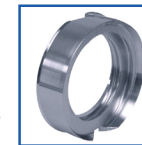

Minimise your downtimes by using **Chesterton® 442** split mechanical seals

Minimise your maintenance costs and reduce wear of your shaft sleeves with the **Chesterton® Nomex** braided packing **1730**

Increase the service life of your bearings with **InproSeal®** labyrinth seals

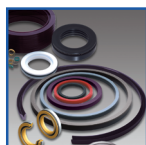

Remove abrasive particles in your fluids with **SpiralTrac®**

Repair and protect your pumps with **ARC 858** and **855** composite materials

Extend the service life of your braided packings with the **SuperSet** kit

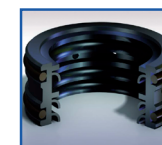

Extend the service life of your hydraulic and pneumatic sealings with **Chesterton®** polymer seals

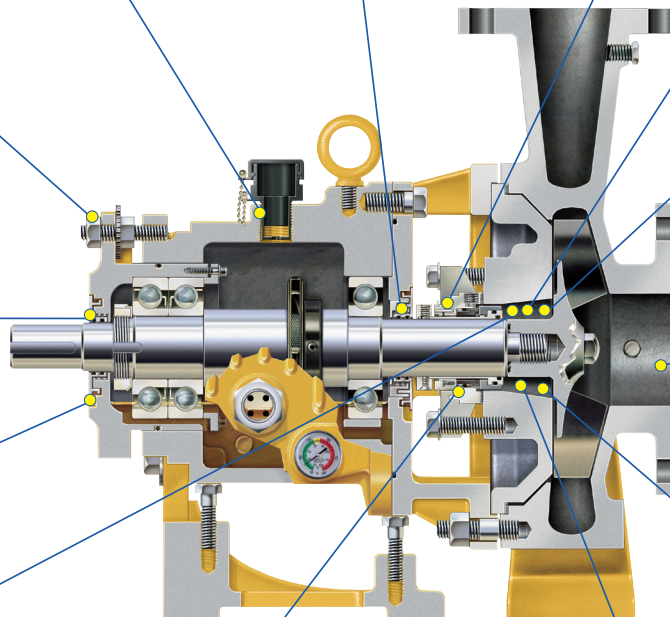

Remove braided packing from your pump and valve stuffing boxes quickly and without damage with the **WaterJet**

Increase the reliability of your mechanical seals with **Chesterton® S10** and **S20** cartridge seals

Obtain a long-term and lasting seal for your viscous fluids and powders with **30KC** cartridge seals

Reduce your operating costs through the use of high-efficiency **Blackmer System One®** pumps
